POLYAC® PF

VERY FAST CURING, PRE-FILLED PUMA RESIN FOR WEARING COURSES WITH HIGH DURABILITY

BENEFITS

- Suitable for traffic after 2 hours, even at temperatures around freezing point
- Tough-elastic properties
- Withstands high dynamic traffic impacts and compression
- Excellent wear resistance - slip resistance depends on the aggregates used
- May be applied with different colours and aggregates
- Very strong self-levelling properties
- Quick and easy to apply
- Minimal disruption to traffic and reduced possession times
- Pre-dosed components

FIELD OF APPLICATION

Wearing coating with high reduction of slide or slip risk:

- On the public road: Cycle paths and cycle suggestion lanes, traffic islands, separation zones, speed ramps, junctions, etc.
- In buildings: safety marking
- In and around buildings: Ramps, parking areas, stairs, balconies and terraces, galleries, driveways
- Stadiums and grandstands

Decorative coating in public and indoor spaces:

On concrete floors, communal areas, footpaths, etc.
