

## EPISOL® 108 BD WILL BE REPLACED BY EPISOL® UNIVERSAL

Dear customers,

EPISOL® 108 BD will be replaced by EPISOL® UNIVERSAL: change planned for October 2023.

Thanks to specific modifications in the formulation of EPISOL® UNIVERSAL, it is now also tested and suitable for use as a heat-resistant system under bituminous sealing(\*) (Thermal shock resistance tested as primer, seal coat and scratch layer according to TL/TP BEL-EP, 250°C with silicone oil).

Because of this development, it was decided to stop producing EPISOL® 108 BD and to replace it integrally with EPISOL® UNIVERSAL.

As an advantage, we can offer it in multiple packages (15, 24, 600 and 3000 kg sets) where previously this was limited to 600 and 3000 kg sets.

EPISOL® UNIVERSAL is an enormously versatile solvent-free epoxy building resin that can be used on various substrates and in various ways.
